

VITALII KOVALENKO

Frontend Developer

PROJECTS

Tech online-store

The following technologies were used to implement this project: React.js SCSS JS HTML React Hooks Slick Slider. With the help of these technologies, a web page was created, which is an online store where users can view and buy products. The web page has dynamic elements such as carousels and sliders that allow you to conveniently browse products and select the right one.

Youtube clone

This project for me is the most ambitious at the moment, which I developed on React.js in which technologies and libraries such as RapidApi, MUI, React.js, Node.js, CSS, Js, HTML, React snippets were applied, this project helped I learned how to make requests to the server and receive a response, there were many problems and errors, but I managed to fix everything and configure the application

Portfolio

This is a business card site that I wrote on React.js in which I used these technologies: HTML, CSS, Js, React Hooks, Node.js. Developing this site helped me improve my skills in React.js
